FALL 2023

Mundy Equine Veterinary Services strives to offer great service as well as competitive pricing. If you find that the cost of any product seems out of line, please mention it to us so we can re-evaluate our prices.

The 60 Day BRD Guarantee A Guarantee You Can Count On!

The BRD guarantee program that Zoetis has offered for years is being offered again! Zoetis is certainly showing confidence in their products and standing behind them with this BRD guarantee!

There is a protocol that **must** be followed on arrival:

Each animal must be given: Draxxin or Draxxin KP + Bovi-Shield Gold One Shot + Ultrabac7/Somnubac

If your first treatment at the pen level exceeds **5%** in the first 60 days on arrival, Zoetis will provide financial support up to a maximum of **\$25.00** per calf treated for BRD over **5%** threshold.

Certain conditions must be followed to qualify for the BRD guarantee:

- Pens must be filled within 10 days upon first calf arrival, no mixing or sorting in the 60-day time window.
- Producers must comply with Zoetis Product Protocol requirements stated above.
- If the pulls exceed **30%** per pen Mundy Medicine must be notified to investigate and develop an appropriate treatment plan.
- The producer must maintain accurate pen inventory records at time of treatments, upon request, provide Zoetis with purchase records, treatment records and processing protocol records.

How do I submit a claim?

If your first-pull treatment rate exceeds 5%, contact Dr. Mundy he will coordinate with Zoetis Territory Manager to verify that the Zoetis BRD CONTROL PROGRAM has been followed and will process your claim.

REBATES! REBATES! REBATES!

For the months of August through to November 2023 we are having a 5% rebate on certain Bovi-Shield vaccines. These include Bovi-Shield Gold 5 and Bovi-Shield Gold One Shot. You will notice this rebate automatically applied to your invoices when you purchase these products.

ALSO! For the months of August through to November of 2023 we are pleased to offer a 2.5% rebate on ALL Revalor implants. This rebate will also be automatically applied to your invoice!

NEW PRODUCT ALERT!

Mundy Equine Veterinary Services is now pleased to offer injectable LS 100 available in 500mL bottles.

Cattle still getting sick after being treated with Draxxin? Here are some options...

First option is Resflor. If they do not respond after 48 hours with Resflor, then try a combination of A180 and Flunixin (Banamine) **OR** Baytril and Flunixin. Lastly, if after another 48 hours they are still not responding it is a chronic issue, try using Excede. We do suggest at this point that you contact the office and discuss treatments with Dr. Mundy.

Deworming for Horses

As we come into the Fall season, we would like to remind you that it is a good time of year to deworm your horses. We have many different dewormers available for your needs. It is suggested that you use a different dewormer in the Fall and Spring. If you're not sure which you used this Spring or if you didn't deworm, we can help you make the decision for which one to use.

Positive Rabies Case in the Wallenstein Area

In July this Summer there was a positive case of rabies found in a bat on a local Wallenstein farm. If you have farm dogs that are not up to date on vaccines, please call in to the clinic and book an appointment to have them vaccinated. If you are unsure of their vaccine status it is best to have them vaccinated with both rabies and the combination vaccine for dogs (referred to as DA2P). The best way to keep track of vaccinations is with a health booklet. If you have one of these for your dogs, then our staff will gladly look over it to determine if and what your dog needs to be vaccinated with. If you do not have a booklet, we can provide you with one when we visit to update their vaccines. These help with keeping track of their vaccines to determine when and what they need annually.

Extension of Office Hours! **Open until 6pm on Wednesday and Thursday**

The office will be extending its hours until 6pm on Wednesdays and Thursdays through the fall season. If any medication or supplies are needed, please stop in. If you call ahead to place your order, then we can have it ready for you. If you are unable to make it in by 6, we ask that you call ahead to let us know so that someone can stay to help you.
