FALL 2024

Mundy Veterinary Services strives to offer great service as well as competitive pricing. If you find that the cost of any product seems out of line, please mention it to us so we can re-evaluate our prices.

The 60 Day BRD Guarantee A Guarantee You Can Count On!

The BRD guarantee program that Zoetis has offered for years is being offered again! Zoetis is certainly showing confidence in their products and standing behind them with this BRD guarantee!

There is a protocol that **must** be followed on arrival:

Each animal must be given: Draxxin or Draxxin KP + Bovi-Shield Gold One Shot + Ultrabac7/Somnubac

If your first treatment at the pen level exceeds **5%** in the first 60 days on arrival, Zoetis will provide financial support up to a maximum of **\$25.00** per calf treated for BRD over **5%** threshold.

Certain conditions must be followed to qualify for the BRD guarantee:

- Pens must be filled within 10 days upon first calf arrival, no mixing or sorting in the 60-day time window.
- Producers must comply with Zoetis Product Protocol requirements stated above.
- If the pulls exceed **30%** per pen Mundy Medicine must be notified to investigate and develop an appropriate treatment plan.
- The producer must maintain accurate pen inventory records at time of treatments, upon request, provide Zoetis with purchase records, treatment records and processing protocol records.

How do I submit a claim?

If your first-pull treatment rate exceeds 5%, contact Dr. Mundy he will coordinate with Zoetis Territory Manager to verify that the Zoetis BRD CONTROL PROGRAM has been followed and will process your claim.

REBATES! REBATES! REBATES!

For the months of **August through to November 2024** we are having a 10% rebate on Bovi-Sheild vaccines including Bovi-Shield Gold 5 and Bovi-Shield Gold One Shot. There is also a 10% rebate on Inforce 3 vaccines and a 5% rebate on **ALL** Revalor implants.

You will notice these rebates automatically applied to your invoices when you purchase these products.

We suggest that you take advantage of the rebates and stockpile a few of these products for any incoming cattle through the winter and into spring.

In addition to these rebates, we have installed some **price reductions** to coincide with them on 500mL Draxxin, 500mL Draxxin KP, Safeguard 3.8L, 250mL Zuprevo and 500mL Resflor.

Please inform us of potential large orders as we can discuss reduced prices on large quantities of products ordered. We strive to offer the most competitive pricing in the market and will do our best to keep the clients happy!

Cattle still getting sick after being treated with Draxxin? Here are some options...

First option is Resflor. If they do not respond after 48 hours with Resflor, then try a combination of A180 and Flunixin (Banamine) **OR** Baytril and Flunixin. Lastly, if after another 48 hours they are still not responding it is a chronic issue, try using Excede. We do suggest at this point that you contact the office and discuss treatments with Dr. Mundy.

New Services!

Mundy Veterinary Services is pleased to offer some new services now available to our clientele.

Cattle processing: Looking for some help with processing your cattle? We now have an experienced team of processors available to help you with your needs.

Cattle charting: If you have cattle that need to be charted for export to the United States, we can now take care of the charting and export papers.

Small Ruminant Ultrasound: If you are looking for pregnancy evaluation for your sheep or goats, we can now take care of your needs.

Fall Equine Reminders

FALL 2024

Mundy Veterinary Services strives to offer great service as well as competitive pricing. If you find that the cost of any product seems out of line, please mention it to us so we can re-evaluate our prices.

Deworming: We recommend deworming your horses twice a year, once in the Spring and again in the Fall. For Fall deworming it should be done after the first good frost, typically around November. Deworming options that we carry are Eqvalan, Eqvalan Gold, Quest and Quest Plus.

Don't forget we also do vaccines for your canines! We cover all dog vaccines from young puppies to mature adults. We do suggest all dogs are up to date on their rabies vaccine as there has been some cases arise.

For all inquiries and bookings please contact the office for more information.
